

Russian Wordsearch Body Parts

Category: Learn Russian

The word search features various body parts in Russian. It consists of a grid filled with letters, where each letter corresponds to a specific cell. The objective is to find the hidden words by locating them in the grid. The words can appear in any direction (horizontally, vertically, diagonally, forwards, or backwards). Your task is to find the Russian words for body parts, such as “голова” (head), “лицо” (face), “ноги” (legs), and many more. Can you find all the body parts hidden in the word search grid? Good luck!
